WEBSITE WHERE THE COMPANIES AND CONSOLIDATED FINANCIAL STATEMENTS ARE AVAILABLE

We hereby certify that this Interim financial report was approved by the Board of Directors of «J&P-AVAX S.A.» on August 28th 2013 and published by means of submission to the Athens Stock Exchange and the Hellenic Capital Markets Commission, as well as their upload to the corporate website (www.jp-avax.gr). It should be noted that the published condensed financial data and information included in the interim condensed financial accounts are aimed at providing readers with a general overview of the financial stance and the results of the Company and the Group, but do not provide the complete view of the financial condition of the Company and the Group, in accordance with the International Financial Reporting Standards.

STATEMENT OF MEMBERS OF THE BOARD OF DIRECTORS

(in accordance with article 5, paragraph 2 of Law 3556/2007)

In our capacity as executive members of the Board of Directors of J&P-AVAX SA (the «Company»), and according to the best of our knowledge, we,

1. Joannou Christos, Chairman & Executive Director
2. Kouvaras Constantinos, Deputy Chairman and Executive Director
3. Mitzalis Constantinos, Managing Director,

declare the following:

- the financial statements for the period from 01.01.2013 to 30.06.2013, prepared under the International Financial Reporting Standards currently in effect, give a true view of the assets, liabilities, equity and financial results of the Company, as well as the businesses included in the consolidation of the Group,
- the semi-annual Report of the Board of Directors of the Company gives a true view of the evolution, the performance and the stance of the Company, as well as the businesses included in the consolidation of the Group, including an overview of the main risks and uncertainties they face.

Marousi, August 28, 2013

CHAIRMAN & EXECUTIVE DIRECTOR	DEPUTY CHAIRMAN & EXECUTIVE DIRECTOR	MANAGING DIRECTOR
JOANNOU CHRISTOS	KOUVARAS CONSTANTINOS	MITZALIS CONSTANTINOS

REPORT OF THE BOARD OF DIRECTORS

FOR THE PERIOD FROM 01.01.2013 TO 30.06.2013

(in accordance with article 5 of Law 3556/2007, as well as articles 3 & 4 of Decision #7/448/11.10.2007 of Greece's Capital Markets Commission)

Dear Shareholders,

the long-term economic crisis affecting Greece has unavoidably been impacting the financial results of J&P-AVAX SA, as public investments are minimal, private sector projects have halted and no new concessions and jointly-funded projects are being brought into the market.

The local construction sector is essentially focusing its hopes on the re-start of large road concession projects and the acceleration of absorption of EU-funds earmarked for our country to co-finance infrastructure works.

Despite the adverse business environment, the Group managed in the first half of 2013 to maintain a marginal profitability and sign a set of projects in Greece and abroad, offering a positive outlook for 2014 and beyond.

At mid-2013, the Group's work-in-hand based on signed projects amounted to around €2.0 billion, with an additional amount of €0.3 billion worth of projects pending to be signed in the near-term. The Group has also topped the bidding process for a number of projects, mostly outside Greece, of considerable aggregate value which is not included in the backlog on prudence grounds until a final tender outcome is declared.

Group Financial Results for the First Half of 2013

Consolidated turnover reached €169.9 million in the first half of 2013 versus €231.8 million in the year-earlier period, posting a 26.7% drop as a set of Group projects has been completed, the re-start of large concession-based roadworks is delayed, and recently added works in Greece and abroad are still at an early stage of resource mobilisation or construction.

The substantial drop in turnover also affected gross profits, which nevertheless eased 3.8% only to €24.2 million in the first half of 2013 versus €25.2 million in the respective six month period of 2012. Gross profit margin was boosted by new project additions.

Despite the drop in overall activity and gross profit, the net result after tax and minorities in the first half of 2013 was a €1.6 million profit as opposed to a €7.2 million loss in the year-earlier six-month period. On a pre tax basis, the Group also produced a €3.2 million profit versus a €4.1 million loss in the first half of 2012.

As part of the broader effort to trim expenses, administrative expenses fell to €14.2 million in the first half of 2013 from €16.6 million in the respective period of 2012. Sales expenses increased slightly to €3.0 million from €2.4 million in the first half of 2012, due to the continuing drive to pursue public works and concessions auctioned in Greece and abroad.

Income from associates grew to €14.6 million in the first half of 2013 versus €6.4 million in the year-earlier period.

Net financial expenses for the Group amounted to €16.4 million, registering a small increase relative to €15.3 million in the first half of 2012, representative of the Group's satisfactory borrowing conditions from the banking system as well as the good balance between short-term and long-term debt amidst the country's financial crisis.

Total net debt for the Group is higher in 2013 relative to 2012, due to considerable delays in the receipt of payments from the Greek State for works delivered. The group's cash liquidity is expected to start improving as early as this year, and in particular from 2014 onwards on growing inflows of dividends from concessions, led by the Athens Ring Road.

Group total net debt reached €524 million on 30.06.2013 after ranging at €480 – 490 million over most of 2012. The main reason behind the increase in net debt is the reduction in cash available for concession-related construction, and to a smaller extent the increase in debt itself.

Group equity improved marginally by €7.2 million during the first half of 2013, amounting to €314.6 million versus €307.4 million at end-2012.

Despite the increase in the balance of the short-term tranche of Group debt, short-term liabilities were down €18 million during the first half of 2013 on the back of a €54 million drop in liabilities to suppliers.

Long-term liabilities increased around €19 million in the first half of the year, mainly due to a roughly equal increase in deferred tax liabilities following the rise in the corporate tax rate from 20% to 26% (see note below).

Current assets recorded a marginal drop during the first half of 2012 reaching €709 million, mainly due to an equal change in cash. The increase in receivables from construction contracts in the first half of 2013 was offset by a reduction in receivables from clients and other receivables. More specifically, receivables from construction contracts rose €18 million to €305 million in the first half of 2013, due to the recent addition of several projects which however as still at early stages of completion. Clients and other receivables fell €17 million, the largest part of which is accounted for by receivables from clients, which fell to €212 million on 30.06.2013 versus €212 million at end-2012.

The Group's financial results for the first half of 2013 are broken down by business segment as follows:

amounts in euro	**Construction**	**Concessions**	**Real Estate & Other Activities**	**Total**

Important Events during the First Half of 2013 & their Impact on Financial Results

The following are the most important events concerning the group during the first half of 2013, and up to the issue date of this report:

Executive Management Changes

The Annual General Meeting of company shareholders in June 2013 approved the appointment of Mr Stelios Georgallides and Mrs Athena Eliades as new executive directors for the rest of the term of the company Board of Directors, ie until 30.06.2015, replacing non-executive directors Mr Leonidas Joannou (non-executive director) and Mr George Demetriou (executive director). The new Board of Directors is as follows:

1	Christos Joannou	Chairman	Executive
2	Konstantinos Kouvaras	Deputy Chairman	Executive
3	Nicholas Gerarhakis	Vice President	Executive
4	Konstantinos Mitzalis	Managing Director	Executive
5	Konstantinos Lysaridis	Director	Executive
6	Stelios Georgallides	Director	Executive
7	Athena Eliades	Director	Executive
8	Efthivoulos Paraskevaides	Director	Non-Executive
9	Leoni Paraskevaides Mavronikola	Director	Non-Executive
10	John Pistiolis	Director	Non-Executive
11	John Hastas	Director	Independent, Non-Executive
12	David Watson	Director	Independent, Non-Executive

Cypriot Banking System Crisis

Under the Central Bank of Cyprus`decree on the Rescue of Banks with own means, 37.5% of uninsured deposits (over €100,000) held on 15.03.2013, will be converted into A-class with a nominal value of €1. On 30.07.2013, the Central Bank of Cyprus decided to raise by 10% to a total of 47.5% the afore-mentioned uninsured deposits to be converted.

The remaining 10% has already been utilized plus an extra 5% will be used in the near term.

Furthermore, 37.5% of the deposits of the legal entity will be converted to 3, 6 and 9 month time deposits.

The balance of the Group's deposits in Cyprus on 15.03.2013 was €9.4 million, of which the amount of €4.5 million (47.5%) was impounded, while at Company level the balance of deposits was €2.6 million and an amount of €1.2 million is impounded. Based on the law regarding impounding of deposits in Cyprus, an equal amount of Bank of Cyprus shares with a nominal value of €1 will be issued in exchange. The Group and the Company booked provisions amounting to €4.5 million and €1.2 million respectively, which were recorded the results of the period. When the Bank of Cyprus shares are distributed and their trading starts, the Group and the Company will proceed to a re-evaluation of the Bank of Cyprus shares at fair value.

Change in the Corporate Income Tax Rate

According to Law 4110/2013, starting on 01.01.2013 the corporate income tax rate was raised from 20% to 26%. This change increased the deferred tax liability of the Group and the Company by €3.4 million and €15.0 million, respectively.

Signing of contract for Energy Project in Lebanon

J&P-AVAX SA signed with the government of Lebanon a contract worth $470 million for the construction of Deir Aamar (Phase II) power plant near the city of Tripoli, Lebanon. The project includes the construction of a 590MW Combined Cycle power plant designed for a triple–fuel firing system considering Heavy Fuel Oil (HFO), Light Fuel Oil (LFO) and Natural Gas (NG) as fuel. The plant includes three gas turbines, three heat recovery steam generators and one steam turbine, along with all necessary marine and on-shore infrastructure. The contract carries a 25-month deadline.

Award of new projects to subsidiary ATHENA SA in the Persian Gulf region

Subsidiary ATHENA SA signed a contract worth €125 million with ALDAR PROPERTIES PJSC of the United Arab Emirates for the construction, operation and maintenance of marine works, along with roadworks, infrastructure and soft landscaping on Yas Island, located east of Abu Dhabi. The project has a 28-month deadline, with an additional 24-month period for the operation and maintenance of all constructions.

ATHENA SA also signed a €30.1 million contract with the consortium building a nuclear power plant in the United Arab Emirates, for related marine works.

Award of LNG facilities contract by Greece's DESFA

The Company signed with DESFA (Greece's gas transmission system operator) a contract worth €98 million for the construction of a 3rd LNG storage tank on the isle of Revithousa near Athens, Greece. The storage tank to be constructed will have a capacity of 95,000 m3, adding to the two existing storage tanks with a combined capacity of 130,000 m3, and will be connected to the existing LNG unloading and gasification facilities. The project has a 34 month deadline.

Award of €293.1 million railway project

Participating in a consortium comprising AKTOR, J&P-AVAX and INTRAKAT, the Company signed with ERGA-OSE SA a contract for the construction of infrastructure for the new twin railway line in the Rododaphni-Psathopyrgos section and the Panagopoula Tunnel, budgeted at €293.1 million (excl. revisions and VAT). The project pertains to the construction of the infrastructure for a 21.5-km section of the new high-speed rail line and all related railway and road works, bridges and underpasses. It also includes construction of the 4.5km-long Panagopoula twin tunnel with connecting shafts and a 0.55km-long access tunnel. The contract sets a 36-month deadline for completion of works.

Despite their magnitude, the afore-mentioned events are expected to have limited impact on 2013 second-half results, as their effects will only be realised on a longer-term basis.

Main Risks & Uncertainties for the Second Half of 2013

Greece's economic environment remains fragile on the back of a long period of falling GDP, disposable income and deterioration of business expectations.

The main issues concerning the Group within the construction sector is a series of external factors and continuing fluctuations in the demand for new projects, offered prices, interest rates, labour and input cost inflation, exchange rates and payment terms.

Management is required to be realistic and balance a number of factors and parameters constituting sources of risk and uncertainty for Group business, to set its strategy and take decisions on day-to-day operations.

The most important risks and uncertainties for the Group in the coming period are the following:

- <u>Input Prices:</u> Several materials used by the Group are internationally-priced commodities, including cement, metal rebars and fuel, which exhibit wide price fluctuations in recent years.
  - The Group is centrally purchasing supplies for all its subsidiaries to secure economies of scale. In several cases it pre-orders large quantities of supplies to lock in their purchase price and escape future price shifts. The easing in commodity prices due to the economic crisis is supporting profit margins, but there is no certainty commodity prices will remain at current levels in coming quarters.

- <u>Financial Risk:</u> The Group is financing its operations with working capital and requires performance bonds be issued by banking institutions to participate in public project tenders and guarantee their proper execution. Interest rates on outstanding debt depend on international financial conditions, while the cost of issuing performance bonds is also affected by prevalent liquidity conditions in the economy. Overall financial risk returned to normal levels since 2010 following the concerted action of major central banks which led key interest rates to particularly low levels.
  - The Group maintains a positive business relationship with the Greek and international banking system, thereby securing the best possible terms. Despite receiving several offers from banks to enter contracts for derivate products, it has so far refrained from interest rate hedging. Total interest rates charged on the Group are ranging at pre-crisis levels despite the considerable increase in interest rate spreads, thereby leading total interest rates for the Group at lower levels relative to those prevailing early in the crisis period.

- Exchange Risks: The Group executes large projects in international markets, but only a small part of those transactions are denominated in currencies other than euro.
    - o In most cases of operations outside the eurozone, the group makes sure its receivables in foreign currency are matched with payables in the same currency, effectively hedging the largest part of its exchange risk.

- Liquidity Risk: Even during economic booms, let alone during the ongoing financial crisis, some clients fail to meet the terms agreed upon in project contracts.
    - o To protect its cash flow management from liquidity risks, the Group maintains ample credit lines and cash. As regards the accounting treatment of doubtful receivables, the Group follows a policy of provisioning for receivables from private projects which has tax ramifications. The provisions booked in the accounts are considerable adequate for receivables from the private sector, given that the risk of default in payments by the Greek State on public projects is negligible, despite continuing delays in actual payments.

- Country / Geo-Political Risk: Political and social developments in Northern Africa and the Persian Gulf since early 2011 show there is real country risk even in regions rich in natural resources, targeted by Greek businesses.
    - o The Group's international activities and expansion in Europe and the Middle East is focused on countries with limited geo-political risk, as evidenced by current developments. Nevertheless, management is re-considering all parameters surrounding its international operations giving priority to the interests of its shareholders and employees in each country where it is present.

Group management cannot remove the afore-mentioned risks and uncertainties, but spares no effort in minimising the risk associated with business decisions. To that direction, and in addition to the measures outlined above, the Company:

- purchases additional insurance in international projects, over and above the Group's policy of extensive insurance in all projects in progress
- has strong partners in Greece and abroad to mitigate business risks and maximise expected returns
- probes new markets through small projects only, to minimise the negative impact of any miscalculation and adverse business conditions,
- does not make transactions in derivative products and other financial instruments which are not linked to its core business, nor does it attempt to speculate on the course of capital markets.

Projections & Prospects for the Second Half of 2013

The Group has recently added several projects of considerable value in Greece and international markets, boosting its signed work-in-hand to levels last seen prior to the outburst of country's financial crisis. Those projects are not expected to have an appreciable impact in the second half of 2013 due to their long-term nature, their construction phase seen peaking around mid-2014.

In the short-run, a larger impact on financial results is expected by the long-awaited final deal of the consortia awarded with large road concessions with the Greek State and the banking system financing the projects. Finalisation of the deal will allow re-starting construction on the projects after a three-year hiatus, immediately impacting Group revenues and profitability given those projects represent a large and very profitable portion of the Group's work in hand.

Bank debt is not expected to ease below first-half levels during the rest of the year, but is expected to be affected positively from 2014 onwards due to dividends received from concessions and revenues from the construction of new projects.

Important Transactions Between the Company and Related Parties

The most important transactions of the Company over the 01.01.2013-30.06.2013 period with related parties, as per IAS 24, pertain to transactions with subsidiaries (as defined in article 42 of Law 2190/1920), are as follows:

Report on Review of Interim Financial Information

To the Shareholders of the Company "**J&P - AVAX S.A.**"

Introduction

We have reviewed the accompanying condensed separate and consolidated statement of financial position of the Company « **J&P - AVAX S.A.**» as of June 30, 2013 and the related condensed separate and consolidated statements of income and comprehensive income, changes in equity and cash flows for the six-month period then ended, as well as the selected explanatory notes that comprise the interim condensed financial information, which form an integral part of the six-month financial report as provided by Law. 3556/2007. Management is responsible for the preparation and presentation of this interim condensed financial information in accordance with International Financial Reporting Standards as they have been adopted by the European Union and applied to interim financial reporting (International Accounting Standard "IAS" 34). Our responsibility is to express a conclusion on this interim condensed financial information, based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, mainly of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently it does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Consequently, with the present document we do not express an audit opinion.

Conclusion

Based on the review conducted, nothing has come to our attention that causes us to believe that the accompanying interim condensed financial information is not prepared, in all material respects, in accordance with IAS 34.

Reference on Other Legal and Regulatory Requirements

Our review has not detected any inconsistency or discrepancy of the other information of the six-month financial report, as required by article 5 of L.3556/2007, with the accompanying condensed financial information.

The following notes are integral part of the Financial Statements.

Notes and accounting policies

A. ABOUT THE COMPANY

A.1 General Information about the Company and the Group

J&P-AVAX S.A. was listed on the Athens Stock Exchange's Main Market in 1994 (then incorporated as AVAX S.A.) and is based in Marousi, in the Attica prefecture. It boasts substantial expertise spanning the entire spectrum of construction activities (infrastructure projects, civil engineering, BOTs, precast works, real estate etc) both in Greece and abroad.

In 2002, former AVAX S.A. merged with its subsidiaries J&P (Hellas) S.A. and ETEK S.A. and was renamed into J&P-AVAX S.A, whereas another 100% subsidiary unit, namely ETETH S.A., merged with its own subsidiary AIXMI S.A. The new business entities which evolved out of these mergers made use of Law 2940/2001 on contractors' certification for public works. The Group's leading company J&P-AVAX S.A. was awarded a 7^{th}-class public works certificate, which is the highest class available, whereas ETETH S.A. acquired a 6^{th}-class certificate and PROET S.A. entered the new public works certification registry with a 3^{rd}-class certificate, which was upgraded to 4^{th}-class towards the end of 2005. In the year 2007 J&P Avax SA acquired the subsidiary Athena SA.

A.2 Activities

Group strategy is structured around four main pillars:

- **Concessions**
  - Intense presence in concession project tenders, to maintain a substantial backlog of projects and secure long-term revenue streams
  - Strengthening the project finance business unit and expanding our network of specialized external business partners (design consultants, financial and insurance advisors, legal firms) to enhance the Group's effectiveness in bidding for concession projects and maximize the return from their operation by means of financial risk management

- **Business Activities**
  - Development along the lines of major international construction groups, diversifying revenue through expansion into related business areas, eg environmental projects, facility maintenance & management, waste management, maintenance of large infrastructure projects, and management of large facilities constructed towards the Athens 2004 Olympic Games
  - Pursuit of synergies of various business activities on Group level

- **Real Estate**
  - Selective investment in quality projects offering high aesthetics and status, focused mainly on the residential and vacation housing sectors, as well as in select commercial and real estate projects
  - Advisory services and development of new markets and products, such as retirement villages

- **Other Activities**
  - Participation in BOT infrastructure projects for the reconstruction of neighboring counties and regions (Eastern & SE Europe, Middle East, North Africa) in collaboration with J&P Overseas and other international partners with long local presence and expertise
  - Promotion of the use of precast technology

B. FINANCIAL REPORTING STANDARDS

J&P-AVAX S.A.'s consolidated accounts for the period running from January 1st, 2013 to June 30th, 2013 are prepared in accordance with the 'historic cost' principle, inclusive of adjustments in various items on both sides of the balance sheet, as well as on the 'going-concern' principle and conform to the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and the interpretations issued by IASB's International Financial Reporting Interpretation Committee (IFRIC) which have been adopted by the European Union.

IASB has issued a series of standards referred to as «IFRS Stable Platform 2005». The Group applies the IFRS Stable Platform 2005 since January 1, 2005 which includes the following standards:

I.A.S. 1	Presentation of Financial Statements
I.A.S. 2	Inventories
I.A.S. 7	Cash Flow Statements
I.A.S. 8	Accounting Policies, Changes in Accounting Estimates and Errors
I.A.S. 10	Events after the Balance Sheet Day
I.A.S. 11	Construction Contracts
I.A.S. 12	Income Taxes
I.A.S. 14	Segment Reporting
I.A.S. 16	Property, Plant and Equipment
I.A.S. 17	Leases
I.A.S. 18	Revenue
I.A.S. 19	Employee Benefits
I.A.S. 20	Accounting for Government Grants and Disclosure of Government Assistance
I.A.S. 21	The Effects of Changes in Foreign Exchange Rates
I.A.S. 23	Borrowing Costs
I.A.S. 24	Related Party Disclosures
I.A.S. 26	Accounting and Reporting by Retirement Benefit Plans
I.A.S. 27	Consolidated and Separate Financial Statements
I.A.S. 28	Investments in Associates
I.A.S. 31	Interests in Joint Ventures
I.A.S. 32	Financial Instruments: Disclosure and Presentation
I.A.S. 33	Earnings per Share
I.A.S. 34	Interim Financial Reporting
I.A.S. 36	Impairment of Assets
I.A.S. 37	Provisions, Contingent Liabilities and Contingent Assets
I.A.S. 38	Intangible Assets
I.A.S. 39	Financial Instruments: Recognition and Measurement
I.A.S. 40	Investment Property
I.F.R.S. 1	First-Time Adoption of International Financial Reporting Standards
I.F.R.S. 3	Business Combinations
I.F.R.S. 5	Non-Current Assets Held for Sale and Discontinued Operations
I.F.R.S. 7	Financial Instruments: Disclosures
I.F.R.S. 8	Operating segments

The policies referred to hereafter are applied consistently to all time periods covered in the accounts.

Preparing Financial Statements under IFRS requires the use of estimates and opinions while applying Company accounting methods. Any important assumptions made by Company management in applying those accounting methods have been noted when deemed necessary.

C. BASIC ACCOUNTING PRINCIPLES

The Group consistently applies the following accounting principles in preparing the attached Financial Statements:

C.1. Business Combinations (I.F.R.S. 3)

Investments in Subsidiaries: All companies managed and controlled, either directly or indirectly, by another company (parent) through ownership of a majority share in the voting rights of the company in which the investment has been made. Subsidiaries are fully consolidated (full consolidation) with the purchase method starting on the date on which their control is assumed, and are excluded from consolidation as soon as their control is relinquished.

Acquisitions of subsidiaries by the Group are entered according to the purchase method. Subsidiary acquisition cost is the fair value of all assets transferred, of all shares issued and all liabilities at the acquisition date, plus any costs directly related to the transaction. The specific assets, liabilities and contingent liabilities acquired through a business combination are accounted for at their fair values irrespective of the percentage of participation. The acquisition cost in excess of the fair value of the acquired net assets is entered as goodwill. Should the total acquisition cost fall short of the fair value of the acquired net assets, the difference is directly entered in the Income Statement.

Intragroup sales, balances and un-realised profits from transactions among Group companies are omitted. Losses among Group companies (un-realised on a Group level) are also eliminated, except when the transaction provides evidence of impairment of the transferred asset. The accounting principles of subsidiaries have been amended for uniformity purposes relative to those adopted by the Group.

At the Company's balance sheet, investment in subsidiaries is stated at cost less loss from impairment, if any. IAS 36 Impairment of Assets requires an impairment test if there is any indication that an asset is impaired.

Investments in Associates: All companies which the Group may influence significantly but do not qualify for subsidiary or Joint Venture status. The Group's assumptions call for ownership between 20% and 50% of a company's voting rights to have significant influence on it. Investments in associates are initially entered in the Company's books at cost and subsequently consolidated using the equity method.

The Group's share into the profit or loss of associates following the acquisition is recognised into the Income Statement, whereas the share into changes in capital reserves following the acquisition is recognised into the reserves. Accumulated changes affect the book value of investments in associates. When the Group's participation into the financial loss of an associate is equal to or exceeds its participation in the associate, inclusive of provisions for bad debts, the Group does not recognise any further losses, except when covering liabilities or making payments on behalf of the associate, or taking other actions as part of its shareholder relationship.

Unrealised profits from transactions between the Group and its associates are omitted according to the participation of the group into those associates. Unrealised gains are omitted, unless the transactions suggest impairment of the transferred assets. Accounting principles of associates have been amended for uniformity purposes relative to those adopted by the Group.

Intragroup balances and transactions, along with Group profits arising from intragroup transactions which have yet to be concluded on a Group level, are eliminated in the consolidated Financial Statements.

Investments in Joint Ventures: Joint Venture types:

1) Joint Ventures with assets under joint control
2) Joint Ventures with activities under joint control

Those joint ventures do no concern the set up of a company, a partnership or other entity which is separate to the joint venture parties.
Separate accounting book-keeping and financial reporting is not required for the joint venture.
Therefore, joint ventures maintain tax records and prepare financial reports merely for fiscal purposes.

Assets, liabilities, income and expenses are recognised in the financial reports of the joint venture parties.

3) joint venture as an entity under joint control, in which a company, a partnership or another entity is set up

Joint ventures of this type keep their own accounting books, prepare financial reports and are subject to the following consolidation methods according to the degree of control and influence by the Group. More specifically:

a) participation in joint ventures with joint control
b) participation in joint ventures with significant influence
c) participation in joint ventures without significant influence (there may be scope for significant influence, but the joint venture partner chooses not to use it)

In case (a), the proportionate consolidation method is applied, ie joint ventures' balance sheets and Income Statements are consolidated either on a line-by-line basis.

In case (b), the equity method is applied, the investment being treated as an associate.

In case (c), the investment is booked at acquisition cost.

Group Structure: J&P-AVAX Group fully consolidates the following subsidiaries:

Company	% of J&P-AVAX's SA participation	Fiscal Years not tax audited
J&P-AVAX S.A., Athens	Parent	2010
ETETH S.A., Salonica	100%	2007-2010
ELVIEX Ltd, Ioannina	60%	2010-2012
PROET S.A., Athens	100%	2010
J&P DEVELOPMENT S.A., Athens	100%	2010
TASK J&P-AVAX S.A., Athens	100%	2010
S.C."ISTRIA DEVELOPMENTS" S.R., Romania	98%	2005-2012
CONCURRENT REAL INVESTMENTS SRL, Romania	95%	2005-2012
SC BUPRA DEVELOPMENT SRL, Romania	99,93%	2005-2012
SOPRA AD, Bulgaria	99,99%	2005-2012
J&P-AVAX IKTEO S.A., Athens	94%	2010
SC FAETHON DEVELOPMENTS SRL, Romania	100%	2006-2012
ATHENA SA, Athens	80,54%	-
E-CONSTRUCTION S.A., Athens	100%	2010
MONDO TRAVEL (ex.TERRA FIRMA S.A.), Athens	99,999%	2010
J&P AVAX CONCESSIONS S.A. (ex. EVIA REAL ESTATE), Athens	99,967%	2008-2010
ATHENS MARINA S.A., Athens	78,2553%	2009-2010
J&P AVAX POLSKA, Poland	100%	2009-2012
JPA TRIKALA S.A., Athens	100%	2010
JPA KORINTH S.A., Athens	100%	2010

Furthermore, in the consolidated financial statements of J&P Avax SA the following subsidiaries of Athena SA are included using the fully consolidation method:

Company	% of Athena's SA participation	Fiscal Years not tax audited
ATHENA LIBYA COMPANY, Libya	65%	-
ATHENA CONCESSIONS S.A., Athens	99%	2005-2010
ARCAT SA, Egaleo Attiki	-	2010
ERGONET SA, Athens	51%	2010
ATHENA ROMANIA SRL, Romania	100%	-

During 2012, the company's auditors completed a tax audit on fiscal year 2011 as per article 82, paragraph 5 of law 2238/1994 and issued a "Tax Compliance Report" with an unqualified opinion. Tax auditing of fiscal year 2011 will be deemed finalized 18 months following the submission of the Tax Compliance Certificate to the Finance Ministry.

For the year ended 31.12.2012, the Company and its subsidiaries subject to tax auditing from an auditor in accordance with paragraph 5 of article 82 of Law 2238/1994, have not yet received a Tax Compliance Certificate because of an extension to 30.09.2013 of the relevant deadline. We do not expect any tax liability differences to arise.

The Group consolidates the following associates using the equity method:

5N S.A., Athens	45,00%
ATHENS CAR PARKS S.A., Athens	20,00%
ATTICA DIODIA S.A., Athens	30,84%
ATTIKI ODOS S.A., Athens	30,83%
POLISPARK S.A., Athens	25,04%
3G S.A., Athens	50,00%
STACY INVESTMENTS Sp.zo.o. Warsaw Poland	50,00%
CAR PARK N.SMIRNI S.A., Athens	20,00%
LEISURE PARKS S.A.(KANOE-KAYAK), Athens	29,62%
LEISURE PARKS OPERATIONS, Athens	25,00%
CYCLADES ENERGY CENTER S.A., Athens	45,00%
SC ORIOL REAL ESTATE SRL, Romania	50,00%
SALONICA PARK S.A., Athens	24,70%
AEGEAN MOTORWAY S.A., Larissa	21,25%

The following Joint Ventures are not included in current period’s financial statements in comparison with those of previous one because the projects are now completed:

1.	J/V ATHENA - DOMIKI KRITIS	Athens	50.00%

2.	J/V ATHENA - EKAT ETAN AE	Athens	55.00%
3.	J/V 6th PROBLITA O.L.TH – A1	Athens	55.56%
4.	PSITALIA NAFTIKI ETERIA	Athens	33.33%
5.	J/V AKTOR – ATHENA (F8781)	Athens	50.00%

The following Joint Ventures whose projects are now completed and which are in the process of dissolution, were not included in the proportional consolidation due to minor materiality effect in the Group's Financial Statement. The financial results (profit/ loss) of those Joint Ventures in the Group's Financial Statements of 2008 were consolidated using the equity method.

C.2a. Property, Plant & Equipment, Investment Property (I.A.S. 16)

Group management selected the **basic method of valuation of operating fixed assets** inclusive of operating property, according to IAS 16 (at acquisition cost, reduced by accumulated depreciation and accumulated impairment charges), following the initial entry of tangible fixed assets on transition date to I.A.S. (01/01/2004).

However, in 2008 the Management decided to adopt the **revaluation model** for the land and buildings category of assets

Revaluation Model

Upon recognition as an asset, a fixed asset whose fair value may be estimated reliably may be revalued, to reflect the fair value at recognition date less any subsequent accumulated impairment of value.
The fair value of land and buildings is usually appraised by auditor-valuators. The fair value of equipment and fixtures is usually their acquisition price.
When tangible fixed assets are revalued, the entire class of similar assets should be revalued.
When the book value of a fixed asset increases as a result of revaluation, the increase is credited directly into the Equity as a Revaluation Surplus.
Increases in value due to revaluation will be recognised through the Income Statement to the extend it reverses an earlier impairment of the same asset, charged in the Income Statement.
Should the book value of an asset be reduced as a result of a revaluation, the decrease in value should be charged in the Income Statement. If a revaluation surplus for that asset exists in Equity, the decrease will be charged directly into Equity up to the value of that surplus. Revaluation surpluses in Equity are transferred to Retained Earnings as soon as the fixed assets are sold or derecognized. Tax

effects on the revaluation of tangible fixed assets are recognised and disclosed according to IAS 12 Income Tax.
The initial implementation of a tangible fixed asset revaluation policy is treated as a revaluation according to IAS 16, not IAS 8.

While applying I.A.S. 36 (on Impairment of Assets), on each reference date Group management effectively estimates whether its asset base shows signs of impairment, comparing the residual value for each asset against its book value.

Subsequent expenditure on fixed assets already appearing on the Company's books are added to that asset's book value only if they increase its future economic benefits. All expenditure (maintenance, survey etc.) for assets not increasing their future economic benefits are realised as expenses in the financial period incurred.

Expenditures incurred for a major repair or survey of a fixed asset are realised as expenses in the financial period in which they are incurred, except when increasing the future economic benefits of the fixed asset, in which case they are added to the book value of the asset.

Depreciation of tangible fixed assets (excluding land which is not depreciated) is calculated on a straight-line basis according to their useful lives. The main depreciation rates are as follows:

Operating Property (buildings)	3%
Investment Property	3%
Machinery	5.3% - 20%
Vehicles	7.5% - 20%
Other equipment	15% - 20%

Residual values and useful lives of tangible fixed assets are subject to revision on balance sheet date. When the book value of fixed tangibles exceeds their recoverable value, the difference (impairment loss) is directly charged as an expense item in the Income Statement.

When disposing of tangible fixed assets, the difference between the revenue from the sale and the book value of the assets is realised as profit or loss in the Income Statement.

Own-produced fixed tangibles constitute an addition to the acquisition cost of the assets in the form of direct cost of personnel participating in their production (including related employer's social security contributions), cost of materials and other general expenses.

C.2b. Investment Property (IAS 40)

J&P Avax group applies IAS 40 for the property regarded as an investment, using the alternative method of valuation, which is the cost model.

Regarding **investment property**, management chose the **alternative method of valuation at acquisition cost (reduced by accumulated depreciation and accumulated impairment charges) according to IAS 16,** following the initial entry of tangible fixed assets on transition date to I.A.S. (01/01/2004).

During 2007 J&P Avax group decided to change the accounting policy, regarding the valuation of investment property, and specifically to apply the fair value model instead of the cost model.
The Management adopts the opinion that the accounting policy of the fair value model for the investment property valuation provides more credible and relevant information because it is based on up-dated values.

According to IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors", paragraph 52, the retrospective application of a new accounting policy requires the distinction of the information that:
a)Indicate the prevailing facts at the transaction dates.
b)Would be available when the financial statements of these previous periods were approved to be published.
For certain estimations (e.g. fair value estimation not based on an observable price or observable inputs) the distinction of the information is not possible.

When the retrospective application, or the retrospective restatement would require significant estimation, for which the separation of the information is not feasible, then the retrospective application of the new accounting policy is not feasible too.

The Management examined the prospect to recognize both cases of the change in accounting policy. They deduced that the change could not be accounted retrospectively. Therefore, the accounting policy will be applied on a future basis beginning from 2007.

C.3. Intangible Assets (I.A.S. 38)

These expenses should be amortised during the financial period in which they are incurred. Only expenses meeting the criteria of I.A.S. 38.18 are capitalized, such as expenses for computer software and licences. Long-term expenses not meeting the criteria of I.A.S. 38.18 are written off in applying IFRS. Intangible assets include software licences.

C.4. Impairment of Assets (I.A.S. 36)

i) Goodwill
Goodwill represents the additional price paid by the Group for the acquisition of new subsidiaries, joint ventures, and associates. It arises from the comparison of the price paid for the acquisition of a new company with the proportion of the group share to the fair value of the net assets, during the acquisition date. The arisen goodwill from the acquisition of the new subsidiaries and joint ventures is recognized to intangible assets. Every year impairment test for the goodwill is conducted, which decreases the original amount as it is recognized in the balance sheet. During the calculation of profit or loss arisen from participation disposal, the relevant (if any) goodwill is taken under consideration of the disposed company.

For an easier processing of impairment tests, goodwill is allocated to Cash Generating Units (CGU's). The CGU is the smallest identifiable unit of assets which creates independent cash flows and represents the level at which the Group collects and presents the financial data for reasons of internal information. The impairment for the goodwill, is determined from the calculation of the recoverable amount of the CGU's with which the goodwill is connected. Impairment loss which is related with goodwill cannot be reversed in future periods. The Group conducts the annual test for goodwill impairment at 31 December of each accounting period.

In case that the fair value of net assets of a company during the acquisition date is higher than the price paid for the acquisition, negative goodwill is recognized (income), which goes directly in the Income Statement.

I.A.S. 36 applies for the impairment of subsidiaries acquisition or I.A.S. 39 for participation to associates, and other participating interest companies.

ii) Other Assets
Assets with an infinite useful life are not depreciated and are subject to annual review for impairment, whenever events take place showing their book value is not recoverable. Assets being depreciated are subject to review of their value impairment when there are indications that their book value shall not be recovered.
Net Selling Price (NSP) is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable willing parties, less the costs of disposal. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. At each balance sheet date, management assess whether there is an indication of impairment as required by I.A.S. 36, requiring that the book value of assets does not exceed their recoverable amount. Recoverable amount is the highest between Net Selling Price and Value in Use.

This evaluation also takes into account all available information, either from internal or external sources. Impairment review is applied on all assets except for inventories, construction contracts, deferred tax receivables, financial assets falling under I.A.S. 39, investment property and non-current assets classified as being held for disposal.

Impairment losses are charged in the Income Statement.

C.5. Inventories (I.A.S. 2)

On Balance Sheet date, inventories are valued at the lowest between cost and Net Realisable Value (NRV). NRV is the estimated selling price in the ordinary course of business, less the estimated cost of completion and the estimated costs necessary to make the sale. Inventory cost does not include financial expenses.

C.6. Financial Instruments: Recognition and Measurement (I.A.S. 39)

The standard outlines the principles for recognition and measurement of financial instruments, financial liabilities and certain contracts for purchase or sale of non financial instruments. The financial instruments of the Group are classified in the following categories according to the substance of the contract and the purpose for which they were purchased. Purchases and sales of investments are recognised on trade date, which is the date on which the Group commits itself in purchasing or selling the asset. Investments are initially recognized at fair value plus related transaction expenses, with the exception of transaction expenses for assets which are recognized at fair value and through the income statement. Investments are written off when the right to the related cash flows expires or is transferred and the Group has in substance transferred all risks and rewards relating to ownership.

i) Financial assets/liabilities valued at fair value through the income statement
These comprise financial assets/liabilities that satisfy any of the following conditions:

- Financial assets/liabilities held for trading purposes (including derivatives, except those designated and effective hedging instruments, those acquired or created for the purpose of sale or repurchase, and those that are part of a portfolio of designated financial instruments).
- Upon initial recognition, it is designated by the company as an instrument valued at fair value, with any changes recognised through the Income Statement.

Realised and unrealised profits or losses arising from changes in the fair value of financial assets valued at their fair value with changes in the income statement, are recognized in the income statement at the period in which they result.

ii) Loans and receivables
They include non-derivative financial assets with fixed or predefined payments which are not traded in active markets. This category (loans and receivables) does not include:

- receivables from advances for the purchase of goods or services,
- receivables relating to tax transactions, which have been legislatively imposed by the state,
- any receivable not covered by a contract giving the company the right to receive cash or other financial fixed assets.

Loans and receivables are initially recognised at their fair value and then measured at net book cost based upon the real interest rate method.

iii) Investments held to maturity
These include non derivative financial assets with fixed or defined payments and specific maturity and which the Group intends and has the ability to hold till maturity. Assets of this category are initially recognised at fair value and then measured at net book cost based upon the real interest rate method.

iv) Financial assets available for sale
These include non derivative financial assets either designated in this category or not included in any of the previous ones.
Financial assets available for sale are valued at fair value and the relevant profit or loss is recorded in an equity reserve until such assets are sold or characterized as impaired.
During the sale, or when they are characterized as impaired, the profit or loss is transferred to the income statement. Impairment losses that have been recorded to the income statement cannot be reversed through the income statement.

The fair values of financial assets traded in an active market, are defined by the current ask prices. For non-traded instruments, fair values are defined with the use of valuation techniques such as analysis of recent transactions, comparative items that are traded and discounted cash flows. Securities not traded in an active market that have been classified in the category "financial assets available for sale", whose fair value cannot be determined with credibility, are valued at their acquisition cost. At each balance sheet date the Group assesses whether there are objective indications that lead to the conclusion that financial assets have been impaired. For company shares classified as financial assets available for sale, such an indication is a significant or extended decline in the fair value compared to the acquisition cost. If impairment is established, the accumulated loss in equity, which is the difference between acquisition cost and fair value, is transferred to the results.

C.7. Financial Instruments: Presentation (IAS 32)

The principles in this Standard complement the principles for recognising and measuring financial assets and financial liabilities in IAS 39 Financial Instruments: Recognition and Measurement.

This Standard is concerned with the classification of financial instruments into financial assets, financial liabilities and equity instruments, as well as the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities should be offset.

A *financial instrument* is any contract that simultaneously gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

A *financial asset* is any asset that is:

(a) cash

(b) an equity instrument of another entity

(c) a contractual right:

(i) to receive cash or another financial asset from another entity; or
(ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or

(d) a contract that will or may be settled in the entity's own equity instruments and is:

(i) a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments; or
(ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments.

A *financial liability* is any liability that is:

(a) a contractual obligation:

(i) to deliver cash or another financial asset to another entity; or
(ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or

(b) a contract that will or may be settled in the entity's own equity instruments and is:

(i) a non-derivative for which the entity is or may be obliged to deliver a variable number of the entity's own equity instruments; or

(ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments.

An *equity instrument* is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Fair Value is the amount for which an asset could be exchanged for or a liability be settled with between two parties acting on their own will and in full knowledge of market conditions, as part of a transaction carried out on a pure commercial basis.

C.8. Financial Instruments: Disclosures (IFRS 7)

IFRS 7 refers to all risks arising from all financial instruments, except those instruments specifically excluded (e.g. interests in subsidiaries, associates and joint ventures, etc.). The objective of the disclosures is to provide an overview of the Group's use of financial instruments and its exposure to risks they create. The extent of the disclosure required depends on the extent of the Company's use of financial instruments and its exposure to risk. The Group and Company apply IFRS 7 from January 1st, 2007.

C.9. Provisions (I.A.S. 37)

Provisions are recognized when the Group faces legal or substantiated liabilities resulting from past events, their settlement may result in an outflow of resources and the amount of the liability can be reliably estimated. Provisions are reviewed on Balance Sheet date and adjusted to reflect the present value of the expense estimated for settling the liability. Contingent liabilities are not recognized in the financial statements but nevertheless are disclosed in the accompanying notes, except when the probability of an outflow of resources is minimal. Contingent assets are not recognized in the financial statements, but are disclosed in the notes, provided an inflow of economic benefits is probable.

C.10. Government Grants (I.A.S. 20)

The Group recognizes government grants (subsidies) only when there is reasonable assurance that:

a) the enterprise will comply with any conditions attached to the grants,
b) the grant is likely to be received.

Subsidies are entered in the company's books at their fair value and recognized on a consistent basis as revenue, in accordance with the principle of matching the receipts of subsidies with the related expenses.

Subsidies on assets are included in long-term liabilities as deferred income and recognized on a consistent basis as revenues over the expected useful life of the assets.

C.11. The effects of changes in Foreign Exchange Rates (I.A.S. 21)

The financial statements of all Group companies are prepared using the currency of the economic area which the Group mainly operates in (operating currency). Consolidated financial reports are denominated in euros, the operating and presentation currency of the parent Company and its subsidiaries.
Transactions in foreign currency are converted in the operating currency according to the going foreign exchange rates on the date on which transactions take place.

Profit and losses from foreign exchange differences arising from settlement of transactions in foreign currency during the financial reporting period and the conversion of monetary items denominated in foreign currency according to the going exchange rates on balance sheet date are recognised in the Income Statement. Foreign exchange adjustments for non-monetary items valued at fair value are considered part of the fair value and are therefore treated as differences in fair value.

C.12. Equity Capital (I.A.S. 33)

Expenses incurred due to the issue of new shares appear below the deduction of related income tax, reducing the net proceeds from the issue. Expenses incurred due to the issue of new shares to finance the acquisition of another company are included in the target company's total acquisition cost.

C.13. Dividends (I.A.S. 18)

Payments of dividends to parent company shareholders are recognized as a liability in the consolidated financial statements on the date on which the General Assembly of the Shareholders grants its approval on the distribution of the dividend.

C.14. Income Taxes & Deferred Tax (I.A.S. 12)

Income tax expenses appearing in the Income Statement include both tax for the period and deferred tax, which correspond to tax charges or tax returns arising from benefits realized within the reporting period in question but booked by the tax authorities in earlier or later reporting periods. Income tax is recognized in the Income Statement for the reporting period, except for tax relating to transactions directly charged against shareholders' funds; in that case, income tax is similarly charged directly against shareholders' funds.

Current income tax includes short-term liabilities and/or receivables from the tax authorities related to payable tax on the taxable income of the reporting period, as well as any additional income tax from earlier reporting periods.

Current tax is calculated according to the tax rates and fiscal legislation applied on each reporting period involved, based on the taxable income for the year. All changes in short-term tax items listed on either side of the balance sheet are recognized as part of the tax expense in the Income Statement.

Deferred income tax is calculated by means of the liability arising from the temporary difference between book value and the tax base of asset and liabilities. No deferred income tax is entered when arising from the initial recognition of assets or liabilities in a transaction, excluding corporate mergers, which did not affect the reported or taxable profit / loss at that time.

Deferred tax income and liabilities are valued according to the tax rates expected to apply in the reporting period in which the receipt or payment will be settled, taking into account the tax rates (and fiscal laws) introduced or in effect until the reporting date. The tax rate in effect on the day following the reporting date is used whenever the timing of reversal of temporary differences cannot be accurately determined.

Deferred tax receivables are recognized to the extent in which taxable profits will arise in the future while making use of the temporary difference which gives rise to the deferred tax receivable.

Deferred income tax is recognized for the temporary differences arising from investments in subsidiaries and affiliates, excluding those cases where de-recognition of temporary differences is controlled by the Group and temporary differences are not expected to be derecognized in the foreseeable future.

Most changes in deferred tax receivables or liabilities are recognised as tax expenses in the Income Statement. Only changes in assets or liabilities affecting temporary differences (e.g. asset revaluations) which are recognized directly against the Group's shareholders' funds do result in changes in deferred tax receivables or liabilities being charged against the relevant revaluation reserve.

C.15. Personnel Benefits (I.A.S. 19)

Short-term benefits:
Short-term benefits to personnel (excluding termination benefits) in money and in kind are recognized as an expense when deemed payable. Portions of the benefit yet unpaid are classified as a liability, whereas if the amount already paid exceeds the benefit then the company recognizes the excess amount as an asset (prepaid expenses) only to the extent to which the prepayment will result in a reduction in future payments or to a fund return.

Retirement benefits:
Benefits at retirement from service include a defined contribution plan as well as a defined benefit plan.

Defined Contribution Plan:
According to the plan, the company's legal liability is limited to the amount agreed for contribution to the institution (social security fund) managing employer contributions and handing out benefits (pensions, medical plans etc).

The accrued cost of defined contribution plans is classified as an expense in the corresponding financial reporting period.

Defined Benefit Plan:
The Company has legal liability for personnel benefits due to lay-offs ahead of retirement date or benefits upon retirement from service, in accordance with pertinent legislation.
The Projected Unit Credit Method is used to calculate the present value of defined benefit obligations, the related current cost of services and the cost of services rendered which is the accrued services method, according to which benefits are paid at the financial periods in which the retirement benefit liability is founded. Liabilities arise while employees provide services qualifying for retirement benefits.

The Projected Unit Credit Method therefore requires that benefits are paid in both the current reporting period (to calculate the current cost of services) and in the current and past reporting periods (to calculate the present value of defined benefit obligations).
Despite the fact that remaining in service with the Company is a prerequisite for receiving benefits (ie benefits cannot be taken for granted by employees), liabilities are calculated using actuarial methods as follows:

Demographic Assumptions: Personnel Turnover (Staff Resignations / Staff Lay-offs), and

Financial Assumptions: discount rate, future salary levels (calculated using government bond yield of equal maturities) and estimated future changes in state benefits affecting payable benefits.

C.16. Revenue Recognition (I.A.S. 18)

Revenues include the fair value of works, sales of goods and services, net of VAT, discounts and returns. IntraGroup revenues are completely eliminated. Recognition of revenues is done as follows:

Construction Contracts:
Revenues from projects towards signed contracts are entered in the reporting period in which the works were carried out, based on their stage of completion

Sale of Goods:
Sale of goods are recognized when the Group makes actual delivery of the goods to their buyers who in turn formally accept them, rendering their price secure for receipt.

Provision of services:
Revenues from provision of services are entered in the reporting period in which the services were rendered, according to the stage of completion of the services.

C.17. Leases (I.A.S. 17)

Financial leases are all leases on fixed assets which transfer onto the Group all risks and benefits in relation to those assets' ownership, irrespective of the eventual transfer of ownership of the assets.
These leases are capitalized at the start of the lease using the lowest price between the fair value of the fixed asset and the present value of the minimum lease. All leases comprise a liability and a financial expense, securing a fixed interest rate for the balance of the financial liability. Liabilities arising from leases, net of financial expenses, are entered as liabilities in the balance sheet. The portion of financial expenses arising from financial leases is recognized in the Income Statement throughout the term of the lease. Fixed assets acquired via financial leases are depreciated over the lowest term between their useful life and their lease term.

Lease agreements in which the lessee transfers the right of usage of an asset for a fixed time period but not the risks and rewards of the asset's ownership, are classified as operating leases. Payments for operating leases (net of any discounts offered by the lessor) are recognized in the Income Statement proportionately over the term of the lease.

Fixed assets leased as lessor through operating leases are included as tangible assets in the balance sheet and depreciated over their expected useful lives using the same procedure as other fully-owned tangibles. Proceeds from leases (net of any discounts offered to the lessee) are recognized on a straight-line basis over the lease term. The Group does not lease fixed assets using the financial lease method.

C.18. Construction Contracts (I.A.S. 11)

Construction contracts refer to the construction of assets or a group of related assets on behalf of clients according to terms laid out in relevant contract agreements, their construction usually spanning more than one reporting period.

Expenses arising from the contract are recognized at the time they are incurred.

If the profitability of a construction contract cannot be reliably estimated, and especially when the project is at an early stage of completion, revenues are recognized to the extent that construction costs may be recovered, and construction costs must be recognized in the income statement of the reporting period in which they came about. Therefore, the level of revenues recognized from those construction contracts must be set accordingly to yield zero profitability for the project.

If the profitability of a construction contract may be reliably estimated, revenues and expenses arising from that contract are recognized during the term of the contract as revenue and expense, respectively. The Group uses the percentage of completion method to set the revenue and expense to be recognized over each reporting period. The stage of completion is calculated on the basis of the construction cost realized until reporting date in relation to the total estimated cost of each project.

If total costs from a construction contract are likely to exceed the relevant total revenues, the expected loss is recognised immediately in the income statement as an expense item.

In calculating the cost realised during a reporting period, expenses linked to future works arising from a construction contract are excluded and entered in the accounts as work-in-progress. Total realised costs and profit / loss recognised on each contract are compared to the invoiced works till the end of the reporting period.

If realised expenses, plus net realised profit and less any realised losses, exceed the invoiced works then the difference is entered as a receivable from clients (Construction Contracts). If invoiced works exceed realised expenses, plus net realised profits and less realised losses, the balance is entered as a liability to contract clients.

Contract Grouping:
The initial contract for a project, along with any additional works and extensions to the contract, are treated as a single project because new contracts for additions and extensions pertain to works on the same project and their value is related to the value of the initial contract.
A group of projects is treated as a single project if their negotiation is done jointly or the relevant contracts are linked with each other and constitute parts of a broader project with a total profit margin, or each contract is carried out simultaneously or in a certain order.

Project Revenues: Revenues from projects include the following:
- Initial contract value, plus any revisions of the initial contract, extensions and additions
- Claims
- Incentive payments, e.g. for early delivery

Claims and incentive payments are taken into account to the extent that they may be realised with a strong likelihood and be accurately defined and calculated.

Project Cost: The cost of projects includes the following:
- Costs directly related to a project
- Costs attributed to a particular project and can be allocated to the same project
- Other costs billed to a specific client, according to the terms of the contract

The second case includes all general construction expenses. Those expenses are regularly allocated using reasonable and consistent methodologies and allocation practices, across all similar expense items.

Indirect cost of projects include costs such as clerical work on staff payroll, and bank expenses related to the projects.
Expenses not allocated or classified to a specific project include sale expenses, R&D expenses, general administrative expenses and depreciation of idle equipment, which are not employed in that project.

C.19. Debt and receivables (I.A.S. 23)

Debt and receivables include non-derivative financial assets with fixed or otherwise predefined payments, which are not traded on active markets. They exclude

a) receivables from prepayments on goods or services,
b) receivables related to legislation-induced transactions in taxes,
c) any other items not provided for by contracts offering the Company the right to receive payment of cash or other financial assets.

Debt and receivables are included in current assets, with the exception of those expiring over 12 months after reporting date which are entered as non-current assets.
On every Balance Sheet date, the Group evaluates the existence of objective indications of impairment of its financial assets.
Dent and receivables are recognized at their non-depreciated cost using the real interest rate method. Losses are directly and fully charged against the reporting period's income statement.
Each receivable item of substantial value is evaluated individually for impairment, whereas lower-valued items may be jointly evaluated. When jointly evaluated, lower-valued receivables should be grouped according to their credit risk rating (i.e. the items should be classified according to their risk profile).

Should the value impairment loss be eliminated according to some objective indications in subsequent reporting periods, it should be derecognized and immediately charged in the income statement. The value of derecognition should not result in a non-depreciated cost which is in excess of the value of the receivable at the date of derecognition, provided there was no impairment loss.

C.20. Borrowing Cost (I.A.S. 23)

Borrowing cost refers to interest charged on debt, as well as other expenses incurred by the company in securing that debt.

Included in borrowing costs are:
- Interest expenses on short-term and long-term bank loans, as well as overdraft interest charges
- Amortisation of par discount arising from bond loan issues
- Amortisation of additional expenses incurred in securing a loan
- Financial expenses from financial leases, as defined in I.A.S. 17
- Foreign exchange adjustments, to the extent that they constitute a financial expense

Borrowing costs that can be allocated directly in acquisition, construction or production of an asset which fulfils the requirements should be capitalized.

C.21. Segment reporting (I.A.S. 14)

Business segments are groups of asset items and activities producing products and services which are subject to different risks and returns of the assets and activities of other business segments. Geographic segments are the areas in which the offered products and services differ to those offered in other areas in terms of the risks and return they are subject to.

Every contract being filled by the Group is unique in terms of technical specifications, differentiating it to a small or large extent from other contracts. The projects carried out by the company mainly differ from each other in terms of the intended use by the end-client, nevertheless without differentiating themselves in terms of business risk and return. The Group provides business segment report.

C.22. Related Party Disclosures (I.A.S. 24)

Related party disclosures are governed by I.A.S. 24 and refer to transactions between a company reporting its financial statements and other related parties. Its application is compulsory for reporting periods starting after 1/1/2005. The main issue is the economic substance of transactions, as opposed to their legal form.

A company is considered a related party to a reporting company if:

a) It is directly or indirectly via intermediaries in control, or controlled by or under joint control of the reporting company
b) It controls an equity stake in the reporting company which grants substantial control, or joint control of the reporting company
c) It is an associate, as defined in IAS 28
d) It is a joint venture, as defined in IAS 31
e) It is a key member of the top management team (Board of Directors) of the reporting company or its parent firm
f) It is closely related family-wise to any person matching the first and fourth case noted above
g) It is a company controlled (or under joint control or under substantial influence) by a person matching the fourth and fifth case noted above
h) It is has an employee defined benefit plan in place, where those eligible for receiving the benefits are either the reporting company or the employees of the reporting company

Related party transaction is any transfer of resources, services or liabilities between related parties, irrespective of the payment of a price in return.

D. RISK MANAGEMENT

The operation of the J&P-AVAX Group of companies and the broader business environment present a number of risks which need be dealt with by the Company's management, weighing with realism the relevant cost against the likely impact of those risks.

D.1 Financial Risk

The Group's operations require working capital and performance bonds by banks to guarantee our participation in tenders for projects and subsequently our performance in those projects. The interest rate levied on the Company's bank debt is largely dependent on the European Central Bank's interest rate policy, while the fees charged for issuing the performance bonds are generally considered low due to the Company's large volume of banking business, its excellent creditworthiness and intense competition within the banking sector.

The Company's Finance Department works closely with local and international financial institutions to plan our debt requirements and the volume of performance bonds needed to support projects in progress or in tender process with the lowest possible financial cost.

The Group continuously monitors its needs for derivative interest rate hedging instruments. All short-term debt is taken with variable interest rates while bond loans carry an option to convert their rate into fixed.

D.2 Foreign Exchange Risk

The Group's international business is on an uptrend, hence it is exposed to growing currency risk. The conversion of the Cypriot Pound into euro eliminated the Group's currency risk for that cross-rate given its large work-in-hand in Cyprus.

In Europe, the Group is active in Poland where it bills and receives cash in euro (the projects being funded by the European Union) and about 60% of its expenses are charged and paid in euro. To hedge its risk in expenses denominated in PLN, the Company maintains low levels of debt in PLN as working capital, the bulk of debt being denominated in euro. In Romania the Group is active through its subsidiary ATHENA SA for construction works, and through J&P Development for real estate projects. Real estate property is valued and transactions are done using euro, hence the Group faces no currency risk.

D.3 Input Risk

Several of the raw materials used by the Group are internationally-priced commodities, such as cement, metal grids and fuel. Price volatility in those input materials is eased to some extent as a result of particularities in their supply in Greece, while the Group also purchases raw materials and other inputs centrally to take advantage of economies of scale in quoted prices by suppliers.

D.4 Liquidity Risk

The likelihood of failure to meet its obligations against its clients presents a risk to the Group because this eventuality could challenge the Financial Division's planning for cash liquidity.

Despite the substantial diversification of projects to a large number of clients, both in Greece and abroad, the Group's revenues largely source from the Greek State, other public-sector entities and international state organizations enjoying financial backing by the European Union. In this light, the risk of failure to collect receivables on signed contracts is considered very low, despite occasional delays in collecting payments from even the most reliable clients, such as the Greek State. The Group faces increased credit risk on private projects, which are on the rise relative to the overall level of business. The Group makes a provision on contingent liabilities relating to private projects. The credit risk is monitored by a computer application which analyses the aging breakdown of the receivables. The Group also maintains high credit lines with the banking system to cope with liquidity issues which might arise.

E. NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS TO PUBLISHED STANDARDS

These financial statements comprise the separate financial statement of the Company and the consolidated financial statements of the Group. They have been prepared in accordance with International Financial Reporting Standards (I.F.R.S.), as adopted by the European Union.

The financial statements have been prepared with the same accounting policies of the prior financial year, except for the adoption of the new or revised standards, amendments or/and interpretations that are mandatory for the periods beginning on or after 1 January 2012.

Standards and Interpretations effective for the current financial year

IAS 12 Deferred tax: Recovery of Underlying Assets (Amended). The amendment is effective for annual periods beginning on or after 1 January 2012. This amendment concerns the determination of deferred tax on investment property measured at fair value and also incorporates SIC-21 Income Taxes — Recovery of Revalued Non-Depreciable Assets into IAS 12 for non-depreciable assets measured using the revaluation model in IAS 16. The aim of this amendment is to include a) a rebuttable presumption that deferred tax on investment property measured using the fair value model in IAS 40 should be determined on the basis that its carrying amount will be recovered through sale and b) a requirement that deferred tax on non-depreciable assets, measured using the revaluation model in IAS 16, should always be measured on a sale basis. This amendment has not yet been endorsed by the EU. The Group does not expect that this amendment will have an impact on the financial position or performance of the Group

Standards and Interpretations effective from annual periods beginning on or after 1 July 2012

IAS 1 Presentation of Financial Statements (amended): The amendment is effective for annual periods beginning on or after 1 July 2012. This amendment changes the grouping of items presented in Other Comprehensive Income. Items that could be reclassified (or "recycled") to profit or loss at a future point in time (for example, upon derecognition or settlement) would be presented separately from items which will never be reclassified. This amendment has not yet been endorsed by the EU.

IAS 19 Employee Benefits (amended). The amendment is effective for annual periods beginning on or after 1 January 2013. The amended IAS 19 proposes major changes to the accounting for employee benefits, including the removal of the option for deferred recognition of changes in pension plan assets and liabilities (known as the "corridor approach"). The result is greater balance sheet volatility for those entities currently applying the corridor approach. These amendments will limit the changes in the net pension asset (liability) recognised in profit or loss to net interest income (expense) and service costs. Expected returns on plan assets will be replaced by a credit to income based on the corporate bond yield rate. In addition, the revised standard requires immediate recognition of past service costs as a result of plan amendments (in the income statement) and requires termination benefits to be recognised only when the offer becomes legally binding and cannot be withdrawn. Early application is permitted. This amendment has not yet been endorsed by the EU. The Group is in the process of assessing the impact of this amendment on the financial position or performance of the Group.

IAS 27 "Separate financial statements" (Revised)
The Standard is effective for annual periods beginning on or after 1 January 2014, as adopted by the EU. This Standard is issued concurrently with IFRS 10 and together, the two IFRSs supersede IAS 27 "Consolidated and Separate Financial Statements". The amended IAS 27 prescribes the accounting and disclosure requirements for investment in subsidiaries, joint ventures and associates when an entity prepares separate financial statements.
At the same time, IASB relocated to IAS 27 requirements from IAS 28 "Investments in Associates" and IAS 31 "Interests in Joint Ventures" regarding separate financial statements. Earlier application is permitted. The Group is in the process of assessing the impact of this amendment on the financial position or performance of the Group.

IAS 28 "Investments in associates and joint ventures" (Revised)
The Standard is effective for annual periods beginning on or after 1 January 2014, as adopted by the EU. As a consequence of the new IFRS 11 and IFRS 12, IAS 28 has been renamed IAS 28 "Investments in Associates and Joint Ventures", and describes the application of the equity method to investments in joint ventures in addition to associates. Earlier application is permitted. The Group is in the process of assessing the impact of this amendment on the financial position or performance of the Group.

IFRS 9 Financial Instruments – Phase 1 Classification and Measurement
The new standard is effective for annual periods beginning on or after 1 January 2015. Phase 1 of this new IFRS addresses classification and measurement of financial instruments. Phase 1 of IFRS 9 will have a significant impact on (i) the classification and measurement of financial assets and (ii) a change in reporting for those entities that have designated financial liabilities using the FVO. Early adoption is permitted. This standard has not yet been endorsed by the EU. The Group is in the process of assessing the impact of the new standard on the financial position or performance of the Group.

IFRS 10 Consolidated Financial Statements
The new standard is effective for annual periods beginning on or after 1 January 2014. IFRS 10 establishes a single control model that applies to all entities, including special purpose entities. The changes introduced by IFRS 10 will require management to exercise significant judgment to determine which entities are controlled and, therefore, are required to be consolidated by a parent. Examples of areas of significant judgment include evaluating de facto control, potential voting rights or whether a decision maker is acting as a principal or agent. IFRS 10 replaces the part of IAS 27 Consolidated and Separate Financial Statements related to consolidated financial statements and replaces SIC 12 Consolidation — Special Purpose Entities. This standard has not yet been endorsed by the EU. The Group is in the process of assessing the impact of the new standard on the financial position or performance of the Group.

IFRS 11 Joint Arrangements. The new standard is effective for annual periods beginning on or after 1 January 2013. IFRS 11 eliminates proportionate consolidation of jointly controlled entities. Under IFRS 11, jointly controlled entities, if classified as joint ventures (a newly defined term), must be accounted for using the equity method. Additionally, jointly controlled assets and operations are joint operations under IFRS 11, and the accounting for those arrangements will generally be consistent with today's accounting. That is, the entity will continue to recognize its relative share of assets, liabilities, revenues and expenses. IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC 13 Jointly Controlled Entities — Non-Monetary Contributions by Venturers. This standard has not yet been endorsed by the EU. The Group is in the process of assessing the impact of the new standard on the financial position or performance of the Group.

IFRS 12 Disclosures of Interests in Other Entities. The new standard is effective for annual periods beginning on or after 1 January 2013. IFRS 12 combines the disclosure requirements for an entity's interests in subsidiaries, joint arrangements, investments in associates and structured entities into one comprehensive disclosure standard. A number of new disclosures also will be required such as disclosing the judgments made to determine control over another entity. IFRS 12 replaces the requirements previously included in IAS 27, IAS 31, and IAS 28 Investments in Associates. This standard has not yet been endorsed by the EU. The Group is in the process of assessing the impact of the new standard on the financial position or performance of the Group.

IFRS 10, IFRS 11 and IFRS 12 (Amendments) "Transition Guidance". The guidance is effective for annual periods beginning on or after 1 January 2013. The IASB issued amendments to IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements and IFRS 12 Disclosure of Interests in Other Entities. The amendments change the transition guidance to provide further relief from full retrospective application. The date of initial application' in IFRS 10 is defined as 'the beginning of the annual reporting period in which IFRS 10 is applied for the first time'. The assessment of whether control exists is made at 'the date of initial application' rather than at the beginning of the comparative period. If the control assessment is different between IFRS 10 and IAS 27/SIC-12, retrospective adjustments should be determined. However, if the control assessment is the same, no retrospective application is required. If more than one comparative period is presented, additional relief is given to require only one period to be restated. For the same reasons IASB has also amended IFRS 11 Joint Arrangements and IFRS 12 Disclosure of Interests in Other Entities to provide transition relief. This guidance has not yet been endorsed by the EU. The Group is in the process of assessing the impact of the guidance on the financial position or performance of the Group.

IFRS 13 Fair Value Measurement. The new standard is effective for annual periods beginning on or after 1 January 2013. The main reason of issuance of IFRS 13 is to reduce complexity and improve consistency in application when measuring fair value. It does not change when an entity is required to use fair value but, rather, provides guidance on how to measure fair value under IFRS when fair value is required or permitted by IFRS. IFRS 13 consolidates and clarifies the guidance on how to measure fair value and also to increase convergence with USGAAP which has also been amended by FAASB. This standard should be applied prospectively and early adoption is permitted. This standard has not yet been endorsed by the EU. The Group is in the process of assessing the impact of the new standard on the financial position or performance of the Group.

Amendments to standards that form part of the IASB's 2011 annual improvements project

The amendments set out below describe the key changes to IFRSs following the publication in May 2012 of the results of the IASB's annual improvements project. The effective date for the amendments is for annual periods beginning on or after 1 January 2013. Earlier application is permitted in all cases, provided that fact is disclosed.

These amendments have not yet been endorsed by the EU. The Group is in the process of assessing the impact of the amendments on the financial position or performance of the Group.

IAS 1 Presentation of financial statements. The amendment clarifies the disclosure requirements for comparative information when an entity provides a third balance sheet either (a) as required by IAS 8 "Accounting policies, changes in accounting estimates and errors" or (b) voluntarily.

IAS 16 Property, plant and equipment. The amendment clarifies that spare parts and servicing equipment are classified as property, plant and equipment rather than inventory when they meet the definition of property, plant and equipment, i.e. when they are used for more than one period.

IAS 34 Interim financial reporting. The amendment clarifies the requirements in IAS 34 relating to segment information for total assets and liabilities for each reportable segment to enhance consistency with the requirements in IFRS 8 “Operating Segments”. Total assets and liabilities for a particular reportable segment need to be disclosed only when the amounts are regularly provided to the chief operating decision maker and there has been a material change in the total amount disclosed in the entity’s previous annual financial statements for that reportable segment

NOTES TO THE ACCOUNTS

1. Segment Reporting

(a) Primary reporting format - business segments

The Group is active in 3 main business segments:

- Construction
- Concessions
- Other activities (Real estate development and other activities)

The figures per business segments for the year ended June 30th 2013 are as follows:

	Construction	Concessions	Real Estate and other activities	Total
Total gross sales per segment	160.117.660	1.210.875	9.927.209	171.255.744
Inter-segment sales	(316.400)	-	(1.006.477)	(1.322.877)
Net Sales	**159.801.260**	**1.210.875**	**8.920.732**	**169.932.867**
Gross Profit/ (Loss)	**24.682.597**	**(1.312.821)**	**857.601**	**24.227.377**
Other net operating income/(expenses)	(1.884.376)	28.191	(60.151)	(1.916.336)
Administrative expenses / Selling & Marketing expenses	(11.995.854)	(3.832.489)	(1.402.276)	(17.230.619)
Income/(Losses) from Investments in Associates	189.763	14.274.966	129.079	14.593.808
Profit from operations	**10.992.130**	**9.157.848**	**(475.748)**	**19.674.230**
Losses of financial instruments				372.553
Net financial income / (loss)				(16.804.689)
Profit before tax				**3.242.093**
Tax				(2.970.196)
Profit/ (Loss) after tax				**271.897**
Depreciation	8.101.804	105.423	625.271	8.832.498

The figures per business segments for the period ended June 30th 2012 are as follows:

	Construction	Concessions	Real Estate and other activities	Total
Total gross sales per segment	231.043.138	1.371.867	11.548.983	243.963.988
Inter-segment sales	(9.848.626)	-	(2.298.482)	(12.147.108)
Net Sales	**221.194.513**	**1.371.867**	**9.250.501**	**231.816.880**
Gross Profit/ (Loss)	**23.844.527**	**(569.439)**	**1.911.866**	**25.186.954**
Other net operating income/(expenses)	363.624	39.599	(1.639.017)	(1.235.794)
Administrative expenses / Selling & Marketing expenses	(13.572.362)	(4.159.051)	(1.318.815)	(19.050.227)
Income/(Losses) from Investments in Associates	(4.324)	6.390.493	(33.678)	6.352.492
Profit from operations	**10.631.466**	**1.701.601**	**(1.079.643)**	**11.253.424**
(Losses)/ gain of financial instruments				(244.530)
Net financial income / (loss)				(15.072.216)
Profit before tax				**(4.063.322)**
Tax				(4.917.781)
Profit/ (Loss) after tax				**(8.981.102)**
Depreciation	9.421.203	110.076	659.852	10.191.132

(b) Secondary reporting format - Geographical segments

The group is active in 2 main Geographical segments

- Greece
- International Markets

The figures per segment for the year ended 30th June 2013 are as follows:

	Greece	International Markets	Total
Total gross sales per segment	103.948.322	67.307.423	171.255.744
Inter-segment sales	(1.322.877)	-	(1.322.877)

The account «Other receivables» of ATHENA SA includes the following:

a) The amount of €16,470 thousand pertains to a claim against the shareholders of TECHNIKI ENOSI SA, which was absorbed by ATHENA SA at an earlier time, and was ordered by decision #21/2005 of the Court of Arbitration on 10.06.2005. Following the issue of that decision, the shareholders of TECHNIKI ENOSI SA appealed on 30.08.2005 to the Athens Court of Appeal against decision #21/2005 on grounds of non-existence, and the appeal was presented to court on 19.01.2006. The Athens Court of Appeal issued decision #2471/2006 which dismissed the appeal submitted by the shareholders of TECHNIKI ENOSI SA and ratified decision #21/2005 of the Court of Arbitration. A new appeal was placed and presented as case #31 on 15.10.2007 to Section A1 of the Supreme Court, where the proposal presented by the judges pointed to dismissing the appeal. A 2nd degree Court of Athens also dismissed with its decision #985/2007 a separate appeal submitted on 15.02.2006 by the shareholders of TECHNIKI ENOSI SA against decision #21/2005 of the Court of Arbitration.

The shareholders of TECHNIKI ENOSI SA filed yet another appeal at the Supreme Court, asking the elimination of that decision, but was dismissed by decision #1334/2008 of the Supreme Court. A third appeal was filed against the arbitration decision and was rejected by decision #6879/2010 of the Court of Appeal. To secure its claim, the Company foreclosed every asset of the shareholders who guaranteed their balance sheet of TECHNIKI ENOSI SA at the time of its absorption by ATHENA SA, up to a value of €21.900 thousand.

The Company is in the process of execution of its claim against all property items of the shareholders of TECHNIKI ENOSI SA.
With its decision #5752/2010, the Athens Single-Judge Court of First Instance imposed a halt in the execution of the court order, according to article 938 of the Criminal Law Code, until the final decision is issued on the appeal against the execution process, to be presented to court in March 2013. The decision is erroneous because it accepts the claim that Company makes unlawful use of its right to execute the order, an issue which has been raised repeatedly in the past and has always been rejected. On 5.03.2013 the case has been presented to Court and its decision is pending.

b) The amount of €4.376 thousand pertains to a claim against the shareholders of METTEM SA, which was absorbed by ATHENA SA at an earlier time, as part of their liabilities as guarantors. To secure those claims, a first-degree Court of Athens ruled with decision #7945/10.10.2003 the foreclosure of all mobile assets and property to a maximum value of €8,000 thousand. On 27.02.2008, a suit for financial compensation was debated at a different Court of Athens against those shareholders and the decision was in favour of ATHENA SA. The shareholders of METTEM S.A submitted an appeal against that decision, to be debated at the Athens Court of Appeal.

In the event of a positive outcome of this litigation case for the Company, management intends to proceed immediately with the impounding of all assets (valuables, property, securities, or in custody of third parties) of the shareholders, whether they have been foreclosed or not. The management of the Company estimates that the value of the approved claims may be fully recovered.

Management cannot assess the timing of collection of claims under litigation, nevertheless those claims are included in the accounts at impaired valued as per the International Accounting Standards.

	22.893.538	**27.083.355**	**22.180.991**	**25.727.085**

Advances from clients mostly relate to Concession Projects (Malliakos Kleidi, Korinthos Patras). The amount to be amortized based on budgeted works from 2013 onwards have been reclassified as long term liabilities.

A number of litigation claims against the Group are pending and their final outcome cannot be foreseen at this point. Therefore no provision was made for the Group. It is our view that any claims collected following a Court Order will not change appreciably the Groups Equity.

11. Share capital

13. Encumbrances - Concessions of Receivables

On 30/06/2013 encumbrances valued at €14.280 thousands on the property of subsidiaries of the Group were outstanding to secure bank loans.

14. Important Developments

· Negotiations are currently proceeding among the concessionaries, the lending bank syndicate and the Greek State over two large concession projects (Olympia Odos and Aegean Motorway) the Group participates in. The talks are aimed at renegotiating the contract terms to remove problems relating to land appropriation and project studies causing delays in works that have triggered a temporary halt in bank financing. The Greek State has exhibited its intention to structure the renegotiation of the contracts to allow flexibility in setting toll rates at road sections under construction, without affecting the overall financial return of the concessionaires throughout the full life of the contracts. Recently a first round of negotiations were concluded with the government agreeing to pay contractors damages over the delays. Furthermore preparations are taking place in order for works to resume according to the agreement.

· On 15/03/2013 under the Central Bank of Cyprus` decree on the Rescue of Banks with own means, the 37.5% of uninsured deposits will be converted into class A shares worth of €1 with full voting and dividend rights. On July 30th 2013 the Central Bank of Cyprus decided to increase the formentioned uninsured deposits to 47,5 % .

The remaining 10% has already been utilized plus an extra 5% will be used in the near term.

Furthermore, 37.5% of the deposits of the legal entity will be converted to 6, 9 and 12 months time deposits.

On 15/03/2013 the group bank deposits in Cyprus amounted 9,4 mil. € of which uninsured deposits amounted to 4,5 mil euro (47.5%). Accordingly the company deposits amounted to 2,6 mil. € of which uninsured deposits amounted to 1,2 mil. €. Under the Central Bank of Cyprus` decree the uninsured deposits will be converted into class A shares worth of €1 with full voting and dividend rights thus resulting to a provision for 4,5 mil. € for the group and 1,2 mil. € for the company accordingly.

Upon issuing of the Bank of Cyprus shares mentioned above and as soon as their trading will commence the group and the company will revaluate them using their fair value.

· There are no post balance sheets events, which concern either the Group or the Company where reference, by International Accounting Standards, has to be reported.

15. Transactions with related parties

The Group is controlled by J&P-AVAX. Members of the Board of Directors and related legal entities collectively own 75,9% of the Company's common shares , while the balance of 24,1% is controlled by the broad investment public. Transactions with related parties are booked by the Company and its subsidiaries throughout the year. Sales to and purchases from related parties are carried out at going market prices.

Year-end account balances are not covered with guarantees and their settlement is done on cash terms. The Group did not book any provisions for doubtful receivables from related parties , because payments on those transactions have proceeded smoothly so far. Intra-Group transactions are netted off at consolidation of their financial accounts.

Following is a summary of transactions with related parties during the period 1/1-30/6/2013:

(all amounts in € thousands)

NOTES TO THE ACCOUNTS

1.The accounting policies applied in preparing these Financial Statements are consistent with those applied for the Financial Statements at 31.12.2012.
2. Tax auditing for the Company and the companies of the Group are analysed in note C1 of the Annual Financial Report.

3. There are no important provisions for litigation or claims under arbitration . The estimated amount for the fiscal years not tax audited as of 30.06.2013 is € 862 thousand for the Group and € 353 thousand for the Company. Other provisions as of 30.06.2013 amount to € 12.526 thousand for the Group and € 16.232 thousand for the Company.
4. The companies of the Group , the percentages the Group participates in their share capital, as well as the consolidation method used in the financial statements of the fiscal period of 1/1-30/06/2013, are mentioned analytically in note C1 of the Annual Financial Report.
5.The number of employees at the end of the reporting period at Group level is 1.420 persons (versus of 1.860 on 30/06/2012) and at Company level is 907 (versus of 1.449 on 30/06/12) .
6. Joint Ventures for projects completed and in process of dissolution are not consolidated due to minor materiality effect in the Group Financial Statements. The financial results of these Joint Ventures are recorded in the Group financial statements through Equity consolidation method.

7. Earnings per share are calculated using the weighted average number of shares for the period.
8. The proportional consolidation of Joint Ventures by 100% is effectively the same as full consolidation.
9. The Board of Directors approved the above financial statements on August 28th 2013.
10. Minor differences in sums are due to rounding.
11. Capital expenditure exluding acquisitions for the period of 1/1-30/06/2013 amounted to : Group € 8,1 mil and Company € 0.18 mil.
12. Under the Central Bank of Cyprus` decree the uninsured deposits of 47.5% will be converted into class A shares worth € 1 thus resulting to a provision for 4,5 mil. € for the group and 1,2 mil. € for the company accordingly.
13. The company or any of its subsidiaries doesn't hold any of its own shares for the reporting period.
14. There are no Pledges on the Companie's assets. On 30/06/2013 encumbranches valued at € 14.280 thousand on the property of subdiaries of the Group were outstanding to secure bank loans.
15. The ministry of Development has approved on 28th June of 2013 the capital increase of the subsidiary company Athena SA amounting to 33,4 mil. New common shares of 41,75 mil. where issued by liability capitalization. That resulted to an increase of the Group's participation to Athena from 80,54% to 89,48%.
16. The other comprehensive income after tax for the Group and the Company are as follows (amounts in € thousand):

	GROUP		COMPANY	
	1/1-30/06/13	1/1-30/06/12	1/1-30/06/13	1/1-30/06/12
